

## Don't limit your growth. Flexible power that grows with any ecosystem.

Starline Track Busway combines the flexibility of track lighting with the ability to power other equipment. Its open access design and customizable plug-in units can simultaneously power any type of grow light in addition to other loads such as fans, dehumidifiers, security cameras and more. Starline reduces installation time by eliminating the need for distribution subpanels, maximizing production capacity and revenue, while reducing labor and ongoing maintenance costs.

### BENEFITS

-  Reduced Installation Costs
-  Customizable
-  Reliable

### FEATURES

- Optimal for conversion of old buildings into grow facilities
- Universal IP50 connector, compatible with any lighting fixture
- Plug-in units can be tapped instantly at any location, providing power at the point of use
- Customizable colors and configurations
- Virtually maintenance free

### TECH DATA

- 40 to 1200A systems, 1-phase & 3-phase
- Rated up to 600V AC or DC
- Customizable lengths up to 20 ft (6 m)
- Copper conductors (standard)
- UL, NEC, ETL & IEC certifications
