

## Superior lighting power distribution that's easy to see.

The curtain never falls on Starline Track Busway's lighting capabilities. For decades, our long tradition of innovation has provided new and flexible methods for overhead lighting grid systems. Combining the reliability of busway construction and the versatility of track lighting, it offers a customizable array of power outlet boxes and drop cords for the ever-changing needs of theaters, concerts, and other events. With systems rated for both AC and DC power, you also have the ability to integrate alternative energy sources. It's smart, efficient, and customizable power distribution for any lighting application.

### BENEFITS

-  Cost Savings
-  Customizable
-  Enhanced Safety

### FEATURES

- 4-pole busway can have (2) independent voltages
- Feasible to hang >50 lbs under the busway such as light fixtures, tools, and balancers
- Universal IP50 Connector: works with any lighting fixture, high or low bay
- Easily installed, removed, and transported

### TECH DATA

- UL857 Listed / NEC 250 Approved
- 40A to 1200A, up to 600Vac or 600Vdc
- 380Vdc Lightning capable
- 100% Copper Conductor
- 100% ground: case, dedicated, or isolated
- Extruded Aluminum Housing
